WELCOME TO THE FUTURE...

Where humanity is under constant attack from a brutal alien threat.

The Komplex spreads through the galaxy and growing stronger with each system they conquer, each species they defeat and assimilate. And now they are here.

To defeat them, humanity relies on an elite team, the Forge, who pilots an armada of spacecraft known as Snap Ships. Fast attack craft, armored bombers and so much more, the Snap Ships are designed to be modular to build the perfect ships for battle.

LOCUST K.L.A.W. STEALTH CRAFT

Locust is a small, stealthy attack craft designed to sneak into enemy territory, use its rail gun to disable a ship, and then disappear without a trace. Locust is a formidable threat thanks to its:

- **CL-ARM ROCKETS** that disable enemy sensors
- **THE LOCUST STEALTH DRIVE** with an undetectable thrust signature for undetectable infiltration
- **CL-23 RAILGUN** that can pierce any known Forge armor

BUCKLE UP AND GET READY TO FLY... FAST!

You have discovered the UJU tech dubbed the UX-38 TSM Cloak System. It has the ability to add a reflective property to any conductive material, so connecting to Locust hides it from any known proximity detection technology.
